PROFESSIONAL SUMMARY

MCA graduate (2026, CGPA 7.8) with hands-on internship experience in data analytics, SQL reporting, and Python development. Strong at cleaning messy datasets, writing efficient queries, building dashboards, and delivering insights that non-technical stakeholders can act on. Comfortable owning work end-to-end and switching between analysis, backend, and light ML tasks as needed. Seeking Data Analyst / BI roles with room to grow into broader data or technical leadership responsibilities.

CORE SKILLS

Data Analysis & BI: SQL (MySQL), Power BI, Tableau, Excel, Pandas, NumPy, Matplotlib, Seaborn, statistical analysis, EDA

Programming: Python, JavaScript, HTML5, CSS3, Tailwind CSS

Backend & Databases: Django, Django REST Framework, Flask, REST API design, MySQL, database schema design

Machine Learning: Scikit-learn, TensorFlow, PyTorch, regression/classification, CNNs, feature engineering, model deployment via APIs

Tools: Git/GitHub, Jupyter, Postman, Scrappy, Chart.js, ReportLab

INTERNSHIP EXPERIENCE

Python Data Analytics Intern

Feb 2026 – Present

Qspiders

- Cleaned and prepared 15+ datasets involving missing values, inconsistent formats, and duplicates before analysis.
- Wrote SQL queries (joins, subqueries, aggregations) for data extraction and recurring reports.
- Built weekly dashboards in Matplotlib and Seaborn that replaced a manual spreadsheet workflow.
- Completed 5 case studies applying statistical tests; translated findings into clear business recommendations for non-technical stakeholders.

Machine Learning Developer Intern

Jan 2026 – Feb 2026

iHub Robotics

- Trained regression and classification models on a cleaned dataset of ~11,500 rows using Scikit-learn and TensorFlow; best model reached ~83% accuracy after feature engineering.
- Deployed the selected model behind a Django REST endpoint so the team could request live predictions instead of running notebooks manually.

Python Full Stack Developer Intern

Oct 2023 – Dec 2023

Inmakes

- Built REST API endpoints with Django REST Framework for a data-driven web application backed by MySQL, including schema design and SQL for the data layer.
- Connected the frontend (HTML, CSS, JavaScript) to the APIs for standard CRUD operations and kept the codebase structured for future maintenance.

PROJECTS

Logistics Demand Forecasting

Python, Django, Pandas, Scikit-learn, SQL, JavaScript

- Built a forecasting model on roughly two years of historical logistics data and brought MAPE down to around 13% after feature tuning.
- Wrapped the model in a Django REST backend with a simple dashboard. Route selection that previously took 30–45 minutes now returns results in seconds.

FinTrack – Personal Finance Tracker

Python, Django, SQLite, Tailwind CSS, Chart.js, ReportLab

- Personal project to track income, expenses, budgets, and savings goals. Split the application into separate Django apps (auth, transactions, budgets, reports) so new features stayed manageable.
- Includes real-time overspend alerts against monthly and category limits, a Chart.js dashboard for spending trends, and CSV/PDF export for reports.

Vegetable Quality Inspection (CNN)

Python, Django, TensorFlow, Pandas, SQL, HTML/CSS/JS

- Trained a CNN from scratch to classify vegetable quality into 8 categories using a labeled image dataset; test accuracy reached approximately 90%.

- Connected the model to a Django backend and dashboard that shows quality scores and freshness trends. The approach replaces dedicated sensors with basic cameras, lowering cost and improving scalability.

EDUCATION

Master of Computer Applications (MCA) MES Advanced Institute of Science & Technology CGPA: 7.8	Oct 2024 – Apr 2026
Bachelor of Computer Applications (BCA) SCMS School of Technology & Management	Jun 2019 – Apr 2022

CERTIFICATIONS

Deloitte Australia – Data Analytics Job Simulation (Forage), July 2026 | Credential ID: RpWrnupHopjyQC49B

LANGUAGES

Malayalam, English, Tamil
