Aspiring Data Analyst | Python, SQL, Power BI, Data Visualization

PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in data analysis gained through academic projects and internships. Comfortable with Python, SQL, and Pandas for exploratory data analysis and building dashboards in Power BI, Tableau, and Excel. Completed a 3-month data analytics internship and a machine learning internship, applying statistical analysis and data cleaning to real-world datasets. Looking to bring strong analytical thinking and a fast learning curve to an entry-level Data Analyst role.

CORE COMPETENCIES

Data Analysis: EDA | Data Cleaning | Statistical Analysis | Hypothesis Testing

Programming: Python (Pandas, NumPy, Scikit-learn)

Databases: SQL | Data Querying | Basic ETL

Visualization: Matplotlib | Seaborn | Power BI | Tableau | Advanced Excel (Pivot Tables, VLOOKUP)

Other: Data Storytelling | Problem Solving | Business Insight Generation

INTERNSHIP EXPERIENCE

Python Data Analytics Intern — Qspider (3 months)

- Performed Exploratory Data Analysis (EDA) on real-world datasets using Pandas and NumPy to identify trends and data quality issues
- Built visualizations and dashboards with Matplotlib/Seaborn to present findings in a clear, stakeholder-friendly format
- Wrote SQL queries for data extraction, transformation, and reporting
- Applied basic statistical analysis to support business insight generation

Machine Learning Developer Intern — iHub Robotics (2 months)

- Built and trained ML models for prediction tasks and evaluated their performance on real datasets
- Carried out data preprocessing, feature engineering, and exploratory analysis to support model development

Python Full Stack Developer Intern — Inmakes (2 months)

- Contributed to data-driven web applications built with Django, including backend data handling

ACADEMIC & PERSONAL PROJECTS

Navilog AI — Demand Forecasting System

Built a machine learning model to forecast logistics demand from historical data, aimed at improving resource planning and operational efficiency. Technologies: Python, Pandas, Scikit-learn, Django.

Veg AI Scanner — Quality Analysis System

Built a web application where users upload vegetable images for automated quality assessment using a custom-trained CNN model, returning type, freshness level, and quality score. Generated analytics reports summarizing quality metrics.

Technologies: Python, TensorFlow, Pandas, Django.

Pharma Manager — Inventory Analytics Dashboard

Built an online pharmacy management system with dashboards tracking inventory, sales trends, and customer patterns, using SQL-based reporting for real-time stock monitoring. Technologies: Python, Django, SQL.

LICENSES & CERTIFICATIONS

Deloitte Australia — Data Analytics Job Simulation — Issued by Forage, July 2026 (Credential ID: RpWrnpHopjyQC49B)

EDUCATION

Master of Computer Applications (MCA): MES Advanced Institute of Science & Technology, 2024–2026

Bachelor of Computer Applications (BCA): SCMS School of Technology & Management, 2019–2022

TECHNICAL PROFICIENCY

Languages: Python, SQL

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow

BI / Analytics Tools: Power BI, Tableau, Advanced Excel, Django

Other: Git, Jupyter Notebooks, Machine Learning, Data Visualization, HTML, CSS

LANGUAGES & INTERESTS

Languages: Malayalam, English, Tamil

Interests: Data Visualization, Business Analytics, Video Games, Music, Motorcycle Riding
